## PROFILE

---

DevOps and Cloud Engineer with hands-on experience in AWS, Docker, Kubernetes, Jenkins, GitHub Actions, and Terraform. Built CI/CD pipelines, containerized applications, and deployed them on Kubernetes. Experienced in provisioning AWS infrastructure including networking using Terraform.

### ◆ MY TECH STACK:

---

#### ◆ Cloud Platform

Worked with AWS services to deploy and manage cloud infrastructure, including networking, compute, storage, and monitoring.

#### Docker

Docker (Dockerfile, image build, container management, Docker Hub, networking, volumes)

#### Kubernetes

Deployed and managed containerized applications on Kubernetes (EKS), handling deployments, services, scaling, and configuration management.

#### CI/CD pipelines

Designed and implemented CI/CD pipelines using Jenkins and GitHub Actions to automate build, test, and deployment processes.

#### Git & GitHub

Managed source code using Git and GitHub, including version control, branching strategies, and CI/CD integration.

#### Terraform

Automated cloud infrastructure setup using Terraform to ensure consistency, scalability, and faster deployment.

## PROJECTS

---

### Application Containerization using Docker

*Building and Running Application using Docker Image*

Built Docker image using Dockerfile and deployed application by running containers with proper configuration.

### Cloud Infrastructure Automation using Terraform.

*Provisioning Frontend, Backend, and Database Architecture on AWS*

Provisioned AWS infrastructure using Terraform, deploying frontend, backend, and database across public and private subnets with secure networking and automated setup.

### AWS Infrastructure Setup using Console

*Manual Deployment of Frontend, Backend, and Database Architecture*

Manually configured AWS infrastructure including VPC, subnets, EC2, IAM, and networking components to deploy a multi-tier application architecture.

### Container Deployment on AWS EKS using Kubernetes

*EKS, Kubernetes, Pods, Deployments, Services, LoadBalancer, IAM Roles*

I created an EKS cluster on AWS and deployed containerized applications using Kubernetes. I managed deployments, services, and exposed applications using LoadBalancer.

## EDUCATION

---

### Bachelor of Computer Applications (BCA)

*Integral University,*

Studied computer applications with focus on cloud computing and DevOps tools like AWS, Docker, Kubernetes, Jenkins, and Terraform.
